

# Sweet-Billing Add-On Modules

There is an additional support fee for each module and availability of these modules varies. Please contact an Ortivus Account Manager for more details at 800-537-3927 or sales@ortivusna.com.

## Accounting Periods Module

Provides user-defined accounting periods for reporting charges and credits in a closed-period accounting system.

## Alert Codes Module

Alert users to special information about patients, calls or codes; ideal for notification of bad debt accounts.

## ALS/BLS Splits Reporting Module

Reporting package to calculate revenue sharing between ALS and BLS services when intercept services are used. *(Requires QA module)*

## Archive/Purge Module

Improves speed of reports and data access by archiving or purging calls and patients from your current dataset. *(Includes History Report)*

## ASCII Import Module

Imports data from compatible third-party programs.

## Attachments Module

Provides easy access to documents related to calls or patients (i.e collection letters, correspondence, photos).

## Batch Credits Module

Posts payments for multiple patients from a single task window.

## Call Frequency Reporting Module

Analyzes historic call data to find periods of peak demand for crew schedule planning.

## Clearinghouse Module

Ortivus has partnered with Gateway, Emdeon Direct and Availity clearinghouses to offer more electronic functionality to send the majority of their claims electronically; each of the three options have their own payer list, along with features that set them apart from each other. Per claim charges or monthly fees should be discussed with the respective clearinghouse.

## Collections Module

Comprehensive tools that simplify and assist collection efforts.

## Custom Forms/Statements Module

Creates or modifies forms and statements (e.g. collection letters, signature forms, privacy notices).

## Custom Report Module

Creates custom call or patient reports to meet your specific reporting needs.

## Data Reconciliation module

Updates call or patient information with data from an outside source while maintaining the integrity of your billing system.

## Electronic Claims Module

Submits claims electronically to a variety of payers; different modules are available for respective payers.

## EZ Review Module

Powerful tool that generates interactive lists of calls or patients for review (e.g. call review, collection review).

## Financial Analysis Reporting Module

Analyzes and identifies trends in accounts receivable and time to collections.

## Financial Review Module

Advanced reporting package, providing financial information on anticipated future revenue and credit status of past batches of invoices and electronic claims.

## Medicare Remittance Advice Module

Eliminates data entry for processing Medicare payments by accepting electronic remittance advice (ERA); enables the option of auto deposit for Medicare payments. *(Requires Batch Payments Module)*

## Membership Module

Tracks membership payments and expirations for your subscription-based membership program.

## Quality Assurance Module

Tools to track details on patient care and monitor quality of care.

## Response Time Reporting Module

Summarizes service performance through an analysis of timestamps (i.e. response times, time on scene, and time at destination).

## Task Scheduler Module

Powerful tool that automates the printing of bills, statements or generation of reports on an assigned schedule.
